

## **Environment, Work-Related Health and Safety Policy of the AES Group in Brazil**

The policy of the AES Group companies in Brazil, in their activities relative to power generation, distribution and trade, production of goods and provision of different services, is to ensure its coworkers' physical integrity and health, and to preserve and maintain the environment so as to produce and distribute clean reliable and dependable energy, based on the following commitments:

### **PREVENTION**

To operate focused on the prevention of accidents, incidents, occupational diseases, environmental damages and pollution.

### **SOCIAL RESPONSIBILITY**

To have as the priority objective of actions the benefit of all communities with which the AES Group is related to.

### **AWARENESS**

To ensure that its coworkers and partners are informed, aware and empowered, encouraging them to take on an adequate stance to avoid and to act in situations that jeopardize health, safety and in potential environmental impacts arising from its activities.

### **ON-GOING IMPROVEMENT**

To plan, project and develop its activities on a continuous basis, enhancing the performance of operations, monitoring, in a proactive way, indicators of occupational health, labor safety and the environment, and applying technologies, processes and inputs that minimize the risks for the worker and impacts on the environment, aiming at the health and safety, of its coworkers, of the partner companies and of the community.

### **RESPECT FOR NATURAL RESOURCES**

To use in a rational and sustainable manner the natural resources required for the processes under the responsibility of AES in Brazil.

### **MANAGEMENT OF EMISSIONS**

To mitigate the impacts arising from its activities, reducing their emissions into the environment and into the work environment, seeking solutions that are cost effective and technically sustainable.

### **SUPPLIERS AND CONTRACTED PEOPLE**

To operate in partnership with its suppliers and contracted people, guiding them and establishing criteria to meet the health, safety and environmental requirements, in the provision of services.

### **COMMUNICATION**

To foster awareness, environmental education, health and safety programs with the community into which the company is inserted, backing the development of projects that meet the stakeholders' expectations, and keeping an open and on-going communication by disclosing its practices and performance.

## **COMMITMENT TO THE LEGISLATION**

To operate and to maintain all Units, ensuring compliance with the legislation applicable to health, safety and to the environment, as well as with other requirements relevant to its activities.

The companies' leaders are in charge of implementing, disclosing and causing compliance with this Policy, as well as of ensuring the structure for the definition and analysis of the environment, health and safety objectives and targets. Their coworkers are responsible for practicing this Policy, in an individual and non-transferable manner, ensuring compliance by service providers as well.

Brazil, July 02, 2007.
